Covering the Asteraceae, or Composite, family, the largest family in the Flora of North America area, these three volumes contain nearly 2,420 species classified in 418 genera and 14 tribes. More than 60% of the species are endemic to the flora region and almost 10% are known as introductions that have naturalized. Members of this family of higher plants can be found to flourish in many habitats. Sunflowers, daisies, goldenrods, sagebrush, asters, zinnias, arnicas, chamomile, chrysanthemums, marigolds, chicory, lettuce, coneflowers, ragweeds, tickseeds, thistles, dandelions, tarweeds, cockleburrs, butterweeds, and many other familiar plants are members of the Asteraceae. Each of the genera within these volumes has one or more representative species illustrated with a line drawing; more than 660 species are illustrated. Occurrence maps for nearly 3,300 species and subspecies/varieties accompany the identification keys, descriptions, and discussions about these plants.

**Save 20% when you purchase your *Flora of North America*  
 Volumes 19, 20, and/or 21 now! Simply fill out the order form  
 and mail or fax it to the address or number below before  
 August 31, 2006 and SAVE!**
