
水棘针属  shui ji zhen shu

Herbs annual. Stems erect. Leaves petiolate; leaf blade palmatipartite, margin rarely entire. Panicles terminal; floral leaves similar to stem leaves, reduced; bracteoles linear. Calyx campanulate, 10-veined, veins conspicuous; teeth 5, subregular, enlarged in fruit. Corolla tube included or slightly exserted, not hairy annulate inside, 2-lipped; upper lip 2-lobed, lobes similar to lateral lobes of lower lip; lower lip slightly larger, 3-lobed, middle lobe subcircular. Stamens 4, anterior 2 fertile, involute in bud, elongate after anthesis, exserted from sinus of upper lip, posterior 2 reduced to staminodes, minute, or almost absent; anthers 2-celled, cells divaricate, longitudinally dehiscent, apically confluent. Style unequally 2-cleft, posterior lobe short or inconspicuous. Nutlets obovoid triquetrous.

A monotypic genus: Asia.

水棘针  shui ji zhen

Stems 30–100 cm tall, base sometimes woody, pyramidally branched, purplish, pilose or puberulent especially on nodes. Petiole 0.7–2 cm, purple or purplish green, grooved, narrowly winged, sparsely hirsute; leaf blade triangular to subovate, sometimes purplish, usually 3–5-partite, lobes lanceolate, adaxially puberulent to subglabrous, abaxially glabrous, margin coarsely serrate to double serrate; middle lobe 2.5–4.7 × 0.8–1.5 cm; lateral lobes 2–3.5 × 0.7–1.2 cm, asymmetrical, decurrent. Panicles composed of lax, long pedunculate cymes; peduncle sparsely glandular; bracteoles ca. 1 mm, ciliate. Pedicel 1–2.5 mm, sparsely glandular. Calyx ca. 2 mm, papillate outside, glandular, the 5 accessory veins inconspicuous; teeth triangular, ca. 1 mm, apically acuminate, ciliate. Corolla blue or purplish blue, tube glabrous; limb glandular, lobes of upper lip oblong-ovate to ovate, lower lip slightly larger. Nutlets abaxially netted-wrinkled, adaxially ribbed, smooth, areole ca. 1/2 as long as nutlet. Fl. Aug-Sep, fr. Sep-Oct.

Fields, sandy soil along rivers, open roadsides, streamsides; 200–3400 m. Anhui, Gansu, Hebei, Henan, Hubei, Jilin, Liaoning, Nei Mongol, Shaanxi, Shandong, Shanxi, Sichuan, Xinjiang, Xizang, Yunnan [Japan, Kazakhstan, Korea, Kyrgyzstan, Mongolia, Russia; SW Asia].

Used medicinally for perspiration.
